

## Hi Brite

	A	B	C	D
1	Most early PNC printings were "dead" under long wave UV light. But not all.			
2	Hi Brite stamps are ones that glow under long wave UV light. This is a result of			
3	optical brighteners in the stamp paper. It is possible that you already have			
4	some of these in your collection, so check your strips under LW UV prior to			
5	ordering from this list. All strips are PS5s, F-VF or better, MNH OG.			
6	Note that the intensity of the glow can differ from strip to strip due to the amount			
7	of optical brighteners in a particular batch of paper.
